1. **Economic Impact**

The total economic impact is estimated at $120,000. This figure includes the cost of the project, as well as indirect benefits such as increased tourism and local employment. The project is expected to generate an additional $200,000 in economic activity each year.

This project is a joint initiative between the local government and a private developer. The developer has committed to investing $100,000 in the project, while the government will provide a matching grant of $200,000.

The project is expected to create 50 direct jobs and 100 indirect jobs. The majority of these jobs will be filled by local residents.

The project is scheduled to be completed in 2020, and is expected to bring significant benefits to the local economy.
